&

Industry Exploration and Collaboration Cell

Duration: 28/03/2026 – 03/04/2026

BANNARI AMMAN INSTITUTE OF TECHNOLOGY & INSTITUTIONS INNOVATION COUNCIL

ABOUT THE STUDENT

S.NO	Description	Details
1.	Name of the student	MONISHA.K
2.	Register Number	7376252AL173
3.	Department	B.TECH.AIML
4.	Year of study	I
5.	Contact Number	9025996304
6.	Mail id	monishak.al25@bitsathy.ac.in
7.	Location	kangayam

Local Context – BPI Industry Visit (Basic Details)

Parameter	Details
Organization / Industry Name	SRI SHAKTHI DEPARMENTAL STORE
Location (City / Area)	kullampalayam
Date of Visit	31/03/2026
Time of Visit	11.20AM
Department / Unit Visited	WHOLE STORE
Industry Contact Persons	DEVARAJ
	GOMATHI
Photographic Evidence	ATTACHED BELOW

Relevant SDG Aligned with Industry Operations: SDG 8 – Decent Work and Economic Growth

DAY 1 ORIENTATION, OVERVIEW & THE BIG PICTURE

BPI – SECTION 1 BUSINESS OVERVIEW & END-TO-END FLOW

1.1 Core Purpose

Product/Service	Category	Variants	Problem Solved	Customer Impact
Grocery items	Trading	Rice, oil, snacks	Provides daily needs	Saves time
Vegetables	Trading	Fresh vegetables	Easy access	Convenient
Household items	Trading	Soap, detergent	One place purchase	Effort reduced

Category: ☐ Manufacturing ☐ Service ☒ Trading ☐ Hybrid

Additional Remarks: During my visit, I observed that most customers come regularly for daily need.

BANNARI AMMAN INSTITUTE OF TECHNOLOGY & INSTITUTIONS INNOVATION COUNCIL

1.2 Revenue Model

Revenue Source	Description	Pricing Method	Frequency	% Contribution
Product sales	Selling grocery items	Cost + profit	Daily	High

Main Revenue Driver: DIRECT SELLING OF PRODUCT

Additional Remarks: I noticed that most customers pay using cash and UPI.

1.3 Customer Profile

Segment	Characteristics	Needs	Source Channel
Families	Regular buyers	Daily groceries	Nearby
Workers	Quick purchase	Small items	Walk-in
Students	Limited budge	Snacks	Nearby

Customer Type: ☐ B2B ☒ B2C ☐ Both

Additional Remarks: I observed that many customers are regular and known to the shop owner

BANNARI AMMAN INSTITUTE OF TECHNOLOGY & INSTITUTIONS INNOVATION COUNCIL

1.4 Department Map

Department	Role	Depends On	Outputs To
Procurement	Buying goods	Suppliers	Storage
Storage	Keeping items	Procurement	Sales
Sales	Serving customers	Storage	Billing
Billing	Calculating bill	Sales	Payment
Inventory	Stock checking	Storage	Procurement

Draw Flow Diagram Below:

Additional Remarks: All activities are connected and depend on each other.

1.5 Single Unit Trace

Step No	Department	Activity	Input	Output	Time Taken	Waiting Time
1	Sales	Customer enters	customer	Visit start	0	0
2	Sales	Select items	need	Items selected	2-5mins	low
3	Storage	Check stock	items	confirmed	1-2mins	medium
4	Billing	Calculate bill	items	total	2mins	low
5	Billing	payment	money	paid	1min	low
6	Sales	packing	items	packed	2mins	low

Additional Remarks: During my visit, the process was simple but slow in busy time.

1.6 Time at Each Step

Covered in above table

Additional Remarks:

During peak time, waiting time increases

1.7 Biggest Risk Point

Identify the most critical risk in the process:

Stock shortage and billing errors

Reason:

Items not available leads to customer loss

Additional Remarks:

I observed that some customers leave if items are not available.

1.8 Most Critical Task

Identify the most important task affecting success:

Sales and billing

Reason:

Main process for earning money

Additional Remarks:

It should be done fast and correctly.

BANNARI AMMAN INSTITUTE OF TECHNOLOGY & INSTITUTIONS INNOVATION COUNCIL

2.1 Daily Tasks

Task	Time of Day	System/Memory	Owner	Output	Risk if Missed	Backup Available (Y/N)
Opening shop	morning	memory	owner	Shop open	delay	no
Arranging items	morning	memory	worker	Clean shop	mess	no
sales	Full day	memory	worker	service	loss	no
Cash count	night	memory	owner	record	error	no

Additional Remarks:

Most daily tasks are done based on memory and experience.

2.2 Weekly / Monthly Tasks

Task	Frequency	System/Memory	Owner	Output	Risk if Missed	Backup Available (Y/N)
weekly	weekly	memory	owner	stock	shortage	no
monthly	monthly	memory	owner	paid	delay	no

Additional Remarks:

Stock purchase and payments are not properly recorded.

2.3 System vs Memory Mapping

Task	Is Documented (Y/N)	Where Stored	Access Level	Error Risk

BANNARI AMMAN INSTITUTE OF TECHNOLOGY & INSTITUTIONS INNOVATION COUNCIL

stock	no	memory	owner	high
sales	no	memory	owner	medium

Additional Remarks:

There is no digital system, everything is managed manually.

2.4 Task Ownership

Task	Primary Owner	Secondary Owner	Approval Required (Y/N)	Escalation Path
Purchase	owner	none	yes	owner
sales	worker	owner	no	owner

Additional Remarks:

Owner handles most important tasks in the shop

2.5 Impact if Task is Missed

Task	Immediate Impact	Downstream Impact	Customer Impact	Recovery Time
Stock check	Item missing	Sales loss	Customer leaves	1-2 days

Additional Remarks: Missing tasks can affect sales and customer satisfaction.

2.6 Dependency Risk (Key Person Absence)

Task	Key Person	Can Others Perform (Y/N)	Time to Substitute	Risk Level (H/M/L)
------	------------	--------------------------	--------------------	--------------------

BANNARI AMMAN INSTITUTE OF TECHNOLOGY & INSTITUTIONS INNOVATION COUNCIL

purchase	owner	no	high	hogh
----------	-------	----	------	------

Overall Dependency Level: ☒ High ☐ Medium ☐ Low

Additional Remarks: Shop depends highly on the owner for major activities.

2.7 Handover Readiness

Task	Handover Document Exists (Y/N)	Steps Clearly Defined (Y/N)	Training Required	Time to Handover
Shop work	no	no	needed	1-2 months

Additional Remarks:

New person needs time to learn shop work.

BPI – SECTION 3 (LEAD & ORDER CAPTURE SYSTEM)

3.1 Inquiry Channels

Channel	Type (Online/Offline)	Volume	Handled By	Recorded (Y/N)	Risk
walkin	offline	high	worker	no	loss
phone	offline	medium	owner	no	miss
watsapp	online	low	owner	no	delay

Additional Remarks: Most customers come directly to the shop

BANNARI AMMAN INSTITUTE OF TECHNOLOGY & INSTITUTIONS INNOVATION COUNCIL

3.2 Recording System

Channel	Where Recorded	Format (Digital/Manual)	Accessible To	Error Risk
Walk in	no	none	none	high
phone	partial	notebook	owner	medium

Additional Remarks:

Customer details are not properly recorded.

3.3 Follow-up Process

Stage	Action	Responsible Person	Timeline	System Used	Miss Risk
inquiry	No followup	owner	none	none	high

Additional Remarks:

There is no follow-up system in the shop.

3.4 Lead/Order Tracking

Lead ID	Current Stage	Tracking Method	Updated (Y/N)	Visibility	Delay Risk
none	none	memory	no	low	high

Additional Remarks:

Tracking is done only by memory.

3.5 Lost Lead Evidence

Has any lead/customer inquiry been missed?

BANNARI AMMAN INSTITUTE OF TECHNOLOGY & INSTITUTIONS INNOVATION COUNCIL

☒ Yes ☐ No

If Yes, fill below:

Case	Channel	Reason Missed	Detected How	Impact
Missed call	phone	No response	later	Lost sale

Additional Remarks: Some customers are lost due to missed calls.

3.6 Conversion Gap

Stage	Drop-off %	Reason	Improvement Opportunity
Inquiry purchase	medium	No stock	Better inventory

Additional Remarks:

Stock issues reduce customer purchase.

3.7 Ideal Lead & Order System

Describe ideal process flow:

Digital billing + stock system

Key improvements needed:

Reduce errors, easy tracking

Additional Remarks:

I feel digital system will improve shop work.

BPI – SECTION 4 (STAKEHOLDER INTERACTIONS)

BANNARI AMMAN INSTITUTE OF TECHNOLOGY & INSTITUTIONS INNOVATION COUNCIL

4.1 Owner – Biggest Risk

Owner Name	Role	Identified Risk	Why Critical	Impact Level
owner	owner	Stock issue	Affects sales	high

Additional Remarks:

Owner faces problems in stock and management.

4.2 Owner – Pride vs Concern

Aspect	Pride Area	Concern Area	Reason
customers	trust	competition	price

Additional Remarks:

Customer trust is strong but competition is high.

4.3 Manager – Resource Constraint

Manager Name	Department	Resource Constraint	Impact	Frequency
owner	shop	time	delay	daily

Additional Remarks:

Time and manpower are limited.

4.4 Manager – Operational Gap

Process	Gap Identified	Cause	Impact	Suggested Fix
billing	error	rush	loss	digital

BANNARI AMMAN INSTITUTE OF TECHNOLOGY & INSTITUTIONS INNOVATION COUNCIL

Additional Remarks:

Mistakes happen during busy time.

4.5 Frontline Worker – Shortcut Observation

Worker Role	Task	Shortcut Taken	Reason	Risk Level
worker	sales	No arrangement	Time save	medium

Additional Remarks:

Items are not always arranged properly.

4.6 Worker – Frustration

Worker Role	Task	Frustration	Cause	Impact
worker	sales	Searching items	No items	delay

Additional Remarks:

Worker faces difficulty during rush hours.

4.7 Unimplemented Ideas

Stakeholder	Idea	Why Not Implemented	Feasibility	Expected Impact
owner	Digital system	cost	yes	

Additional Remarks:

Ideas are not implemented due to cost and knowledge.

4.8 Stakeholder Summary Insights

Common patterns observed across stakeholders:

**BANNARI AMMAN INSTITUTE OF
TECHNOLOGY
&
INSTITUTIONS INNOVATION COUNCIL**

Most work is done based on memory. No proper system is used.

Conflicts between stakeholders:

Workers feel pressure during busy time, but work has to be done fast.

Alignment opportunities:

All agree that a simple digital system can make work easier

Additional Remarks: I observed that better system can improve shop efficiency.

**BANNARI AMMAN INSTITUTE OF
TECHNOLOGY
&
INSTITUTIONS INNOVATION COUNCIL**

Mandatory for all (Day 1/ Day 1+2/Day 1+2+3)

FINAL SUMMARY

Top 3 Improvements:

Implement digital billing system

Maintain proper stock management

Improve product arrangement in shop

Conclusion:

The grocery shop is working well but mostly depends on manual work and memory. With simple improvements like digital system and better organization, the shop can become more efficient and avoid mistakes.

Attachment Proofs:
